EDUCATION

- **National Institute of Technology, Kurukshetra** *2021 – 2025 — Haryana, India*
Information Technology; CGPA: 8.62
- **Maharishi Vidya Mandir, Sitapur** *2019 – 2020 — Uttar Pradesh, India*
CBSE (Class XII); Aggregate: 95%

SKILLS SUMMARY

- **Languages:** JavaScript (Node.js), Java, C++, SQL
- **Backend & Frameworks:** Node.js, Express.js, Spring Boot, REST APIs
- **Databases:** MongoDB, SQL Databases, Cassandra, Redis
- **Architecture:** Microservices Architecture, Rule Engines, MVC Architecture, System Design
- **DevOps & Tools:** Docker, Git, Claude, Cursor
- **AI/ML & Automation:** LangChain, LangGraph, AI Agents, RAG, NLP, Generative AI, Hugging Face

WORK EXPERIENCE

- **Paytm — Software Engineer — India** *Jun 2025 - Present*
 - Architect, develop, and maintain scalable backend services using Node.js, Express.js, and Java Spring Boot for high-traffic consumer services.
 - Built an AI-powered agentic SDLC workflow using Claude, Cursor, Jira, and Confluence MCP servers, reducing feature delivery time by 35% and streamlining automated QA handoff generation.
 - Took end-to-end ownership of Cancellation Protect and Travel Insurance services within Paytm Travel, including development, maintenance, and production support.
 - Migrated pricing microservice for Cancellation Protect and Travel Insurance across Paytm Paytm Travel, reducing deployment costs by 10% and improving API response time by 20%.
- **Paytm — Software Engineer Intern — India** *Jan 2025 - Jun 2025*
 - Developed and optimized backend services using Node.js and Express.js, ensuring high performance and scalability.
 - Worked with Drools Rule Engine to streamline dynamic decision-making processes in financial transactions.
 - Designed and deployed automated alerting for API and service failures, improving system reliability and production monitoring.
- **MentorAide — Software Developer Intern — Remote** *Jan 2024 - Jul 2024*
 - Spearheaded the development and maintenance of scalable web applications using React and Redux, ensuring robust user interfaces and optimal performance.
 - Built LSTM and ARIMA-based forecasting pipelines for equity price prediction, resulting in up to 11.45% simulated portfolio returns (LSTM) compared to 7.45% using ARIMA.
 - Utilized a comprehensive tech stack including React, Redux, Python, and TensorFlow.

PROJECTS

- **NeuroHub (LLM-powered Learning Management System)** *Personal Project - Jun 2024*
 - Collaborated with a team of 5 members to develop NeuroHub, a comprehensive learning management system.
 - Integrated AI-generated assignment detection, achieving a 98% accuracy rate, along with a face detection system.
 - Designed user-friendly interfaces and enhanced user experience, resulting in a 30% increase in user engagement.
 - Tech Stack: React, Ant Design, Figma, Microservices, Node.js, JWT, Hugging Face, Transformers, Python, TensorFlow, AWS.

ACHIEVEMENTS

- Awarded a Certificate of Recognition at Paytm for exceptional performance and contributions.
- Top performer in CSI RAIT's Open Code 2022 open-source contribution program.
- Solved 1000+ quality Data Structures and Algorithms problems on platforms such as LeetCode and GeeksforGeeks.
- Selected for the Smart India Hackathon 2023 at the college level.
- Finalist of Hackshetra, a 24-hour-long hackathon.
